A Recent Web Development Graduate...

Pursuing entry/ junior-level Frontend Development opportunities in the industry. Extremely motivated to grow and contribute to any current or future project's success, through determination & collaborative hard work.

I understand that this resume's experience section may not reflect the profile of a typical developer, but I am very determined to change that presently.

E X P E R I E N C E

Project Lead/ Technician

2014/03 – 2021/12   Innovative Networking Solutions, Mascotte, FL

Performed installations, upgrades & maintenance of LAN/ WAN system hardware. Installed & updated software in demanding commercial environments. Constantly studied to maintain a high degree of technical knowledge – each project had different equipment specs & scopes of work.

- Surveyed future jobs & determined project requirements with managers.
- Maintained constant updated communications between onsite & client stakeholders.
- Asserted a constant solution-driven attitude during every project
- Recorded & documented all aspects of install to mitigate future deployment issues

Network Lead Technician

2012/04 – 2014/03   Sirgool Technologies, Hollywood, FL

Collaborated with various system administrators, helpdesks, & analyst teams to accomplish daily technical tasks. Performed end-user/ staff training after completion of project. Modified networking devices to meet client's system requirements. Also responsible for:

- Performed site surveys, Schematic & blueprint readings
- Structured cat5e/6 cabling for major rollouts (IDF/MDF)
- General equipment assembly & integrations for turn-key installs
- Wireless (AP) communications implementation & coverage testing.

Robert Thompson

Junior Software Developer

SOFT SKILLS

- Willingness to learn
- Creativity
- Open-mindedness
- Integrity
- Problem-solving

PORTABLE SKILLS

- Team Player
- Adaptability
- Analytical Reasoning
- Accuracy and Attention to Detail
- Empathy & Humility

EDUCATION

Web Design & Social Media Platforms

University of Central Florida - BA

7/2016 – 12/2020

AS – Electrical Engineering

Broward College, Davie, Florida

1/2003 – 12/2006

EXPERIENCE

Lead POS & Networking Technician

2007/04 - 2012/11   *Spencer Technologies Inc, Medway MA*

Mainly installed/ serviced commercial & retail point-of-sale networks. Projects initiated from site surveys & ended up as fully functioning POS systems. Most tasks were a blend of technology software & hardware deployment mixed with a large chunk of customer service.

- Perfomed preliminary site visits for project managment & development team.
- Hardware & software trouble shooting with local & remote teams
- Trained new personnel to perform basic instaiiation & service tasks efficiently.

Wireless Asset Manager

2006/01 –2007/01   *AwarePoint, CA*

Worked with Hospital's Biomedical engineering personnel to maintain biomed electronics, incubators & medicinal freezers/ refrigerators.

- Managed real time locating system (RTLS) network for equipment.
- Confirmed recorded data of all thermal & non-thermal medical devices
- Duties required a broad spectrum of medical device knowledge – continuous learning of technology (daily).

INTERESTS

Learning/ Practicing MERN Stack Development...

I have been learning more about Web Development as it relates to **full stack** programming **(node.js)** for the past year. During my spare time, I have been utilizing my Udemy account to gain more knowledge about **MERN stack**.

Other areas of interests are **UI/ UX, Middle-Ware (Postman), API Design and Physical computing** (micro-processors). Very recently gained some interest in **JAVA** programming.
